

A CRM APPLICATION FOR THE CHAI SHOP & CO.

PHASE 3 – PROJECT DESIGN PHASE

1. Introduction

The Project Design Phase defines the structure and working model of the CRM application for The Chai Shop & Co. It converts identified requirements into a practical design covering architecture, modules, database, user roles, workflow, interface, and security.

2. System Architecture

The application follows a layered architecture consisting of the Presentation Layer, Application/Business Logic Layer, and Database Layer. The user interface communicates with application logic, while the application logic validates requests and stores or retrieves information from the database.

2. User-Role Design

- Administrator – manages users, permissions, customers, orders, reports, and system settings.
- Manager – monitors customer activities, orders, feedback, sales information, and reports.
- Staff – performs daily customer registration, customer updates, order entry, interaction recording, and feedback entry.

3. Module Design

- User Authentication Module

- Customer Management Module
- Order Management Module
- Interaction Management Module
- Feedback Management Module
- Reports and Analytics Module

4. Database Design

- Users table – stores user account and role information.
- Customers table – stores customer profile and contact details.
- Orders table – stores order date, customer, amount, and status.
- Order_Items table – stores individual products and quantities within orders.
- Products table – stores product names, prices, and availability.
- Interactions table – stores customer communication history.
- Feedback table – stores customer feedback and response information.

5. Functional Design

- User authentication and session control.
- Customer create, view, search, update, and management operations.
- Order and interaction recording.
- Feedback management.

- Reports and summary information.
- Role-based access to protected features.

6. User Interface Design

The interface is designed with a simple dashboard and clear navigation. Major screens include Login, Dashboard, Customer Management, Customer Details, Orders, Feedback, Reports, and User Profile.

Profiles

Action	Profile Name	User License	Custom
Edit Delete	Sales Department	Salesforce	☒

Edit	User, Security	seq	insightsecurity@00df00000hnyraap.com		☒	Analytics Cloud Security User

7. Security Design

The design includes authentication, role-based access, password protection, input validation, session management, and controlled access to customer information.

The screenshot shows the Salesforce Setup interface for the 'job applications' object. The left sidebar contains navigation links: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, and Related Lookup Filters. The main content area is titled 'Fields & Relationships' and shows 6 items, sorted by Field Label. A table lists the fields with columns: FIELD LABEL, FIELD NAME, DATA TYPE, CONTROLLING FIELD, and INDEXED. The fields listed are: candidate (Lookup(candidate), indexed), Created By (Lookup(User), not indexed), job application Name (Text(80), indexed), Last Modified By (Lookup(User), not indexed), Owner (Lookup(User, Group), indexed), and position (Lookup(position), indexed). At the top right of the main area, there are links for New, Deleted Fields, Field Dependencies, and Set History Tracking.

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
candidate	candidate__c	Lookup(candidate)		✓
Created By	CreatedById	Lookup(User)		
job application Name	Name	Text(80)		✓
Last Modified By	LastModifiedById	Lookup(User)		
Owner	OwnerId	Lookup(User, Group)		✓
position	position__c	Lookup(position)		✓

8. Conclusion

The design phase provides a complete blueprint for implementing the CRM application and establishes how users, modules, data, security, and workflows work together.
